RONAK PATEL

ronak1040@gmail.com | +91-8980080954 | github.com/Ronak1040 | LINKEDIN.COM/IN/RONAK-PATEL-SE

Skills

Languages: Python, JavaScript, TypeScript, PHP
Frameworks: Flask, Django, React, Node.js, NestJS, Laravel
Databases: PostgreSQL, MySQL, MongoDB, MSSQL
Developer Tools: Git, Bitbucket, VS Code, PHPStorm, JIRA
Other Technologies: NGINX, DigitalOcean, AWS (EC2, Route53, S3, IAM, Application Load Balancer(ALB), Auto Scaling Group(ASG)), RESTful APIs, WebSocket, REST APIs, GraphQL, Redis, BullMQ, Background Jobs, Caching, API Optimization, Microservices Communication
Soft Skills: Self-learner, Time Management, Problem-Solving, Teamwork, Team Management

Summary

Senior Software Engineer with 5.6 years of experience designing, developing, and scaling high-performance web applications and cloud-native systems. Expertise in Python (Flask, Django) and JavaScript/TypeScript (Node.js, NestJS, React) with strong hands-on experience. Proven track record of modernizing legacy systems into microservices, optimizing database and API performance, and delivering scalable solutions on AWS and cloud infrastructure. Adept at leading cross-functional teams, improving development workflows through CI/CD pipelines, and delivering business-driven solutions with measurable impact.

Education

Sardar Vallabhbhai Patel Institute of Technology, Gujarat Technological University (GTU), India
- Master of Computer Applications **Jul 2018 - Jun 2021**

Work Experience

Senior Software Engineer **Nov'24 - Nov'25**
Canterr: IT Consulting & Solutions Agency
- Decoupling SQL queries by introducing GraphQL, improving API response efficiency by ~30% and reducing backend query complexity by 40% through structured service-layer design.
- Advocating for best coding practices, system observability, and maintainability—reducing post-release defects by 20%.

Senior Software Developer **Feb'24 - Oct'2024**
Aarya SoftEx
- Engineered and executed software architecture strategies in partnership with diverse teams; optimized system performance and maintainability, resulting in a 25% increase in customer satisfaction and retention.
- Orchestrated collaborative efforts across cross-functional teams to design and implement scalable software solutions meeting technical and business demands; streamlined development process, reducing time-to-market by 40%.

Senior PHP Laravel & NodeJS Developer **Aug'22 - Sep'23**
Intellimedia Networks Pvt. Ltd.
- Pioneered the transformation of legacy codebase to a microservices architecture, resulting in a 50% reduction in server response time and a 30% increase in concurrent user capacity.
- Orchestrated the design and deployment of scalable software solutions in PHP, Laravel, NodeJS, and Python, MongoDB increasing system performance by 40% and reducing maintenance costs by 25% annually.

PHP Developer **May'22 - Jul'22**
Inbox Info Tech
- Designed responsive and interactive web applications using PHP, MySQL, MongoDB, and JavaScript, achieving a 25% increase in page load speed and a 15% boost in user engagement. Collaborated closely with designers and front-end developers to ensure seamless user experiences, resulting in a 20% decrease in bounce rate and a 30% improvement in conversion rates.
- Increased user engagement by 20% by implementing responsive design and performance optimization techniques.

Fullstack Developer **Jan'20 - Apr'22**

Vowel Enterprise

- Led end-to-end software development lifecycle, from requirement analysis to deployment and maintenance, resulting in a 30% reduction in system bugs.
- Led the development of front-end and back-end systems using React, JavaScript, Node.js, Python Frameworks, resulting in a 40% reduction in page load time and a 25% increase in website responsiveness. Ensured seamless integration and functionality, leading to a 30% decrease in system errors and a 20% improvement in overall user satisfaction.

Projects

Remote Metering

Technologies: Node.js, Python, MQTT/WebSocket, MongoDB, PostgreSQL, AWS IoT, REST APIs

- Designed and implemented a scalable microservices-based remote metering platform to handle real-time data ingestion, processing, and visualization from IoT-enabled devices. Engineered backend services using event-driven architecture and integrated MQTT/WebSocket protocols for continuous data streaming, enabling automated monitoring, alerting, and reporting.
- Optimized system performance through database indexing and caching strategies (Redis), reducing latency by 40% and improving throughput for high-frequency data streams. Enhanced system scalability and fault tolerance, achieving a 30% reduction in downtime and ensuring reliable data availability across concurrent device connections.

Cricket League

Technologies: *NodeJS, NestJS, MongoDB, PostgreSQL*

- Developed a multiplayer Cricket game, Cricket League, featuring modules for Player Profiles, Match Creation, Real-Time Scoring, Leaderboards, and Tournament Management. Integrated live match updates and interactive gameplay, boosting user engagement by 60% and increasing average session duration by 45%.
- Optimized backend architecture and database performance, reducing API response times by 30% and improving overall system throughput by 40%, ensuring a seamless, real-time gaming experience for players.

Lechef B2B

Technologies: *Flask, NodeJS, NestJS, MySQL, MongoDB*

- Created an e-commerce platform, Lechef B2B, encompassing modules such as Customer Management, Product Catalog, Price List, Price Modifier, Order Processing, Quick Order, and more. This platform led to a 50% increase in daily orders processed and a 40% decrease in order processing time, resulting in improved efficiency and customer satisfaction.
- Optimized codebase and database queries, resulting in a 40% improvement in system performance and a 30% reduction in response time.

Income-Expense

Technologies: *JavaScript, Laravel, Flask, MySQL, MongoDB, AWS*

- Developed a user-friendly platform to track incomes and expenses within the Income-Expense project, providing users with comprehensive reports for financial management. This platform resulted in a 20% increase in user engagement and a 15% decrease in time spent on financial tracking tasks, improving overall financial efficiency and user satisfaction.
- Enabled users to efficiently manage receivables and payables within the platform, resulting in a 25% reduction in overdue payments and a 20% increase in on-time payments.

Clienserv

Technologies: *JavaScript, React, Python, MySQL, MongoDB, AWS*

- Significantly reduced paperwork associated with these services, achieving a 50% reduction in administrative overhead and a 40% increase in operational efficiency.
- Created advanced features including CSV import/export functionality to facilitate efficient data management and record keeping, leading to a 35% reduction in data entry errors and a 30% decrease in processing time.
- Incorporated employee attendance management features, resulting in a 25% decrease in absenteeism rates and a 20% increase in overall workforce productivity.
